Assessment

cloudworkz™

The success of DT initiatives is dependent on employees' voluntary and active efforts to engage in a much larger and complex change process.

University of California Berkeley (2021)

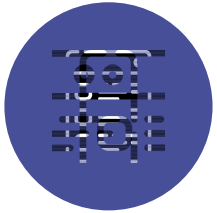
cloudworkz™

As the success of digital transformation initiatives depends on employees' active engagement in the change process, understanding employees' digital mindset is critical.

University of California Berkeley (2021)

cloudworkz

Online measurement tool that allows evaluating the **digital mindset and knowledge** of individuals.



Assessment

2 dimensions:
Mindset & Knowledge

Final Score

Detail of the dimensions
Profile

Dashboard

Average (area, job title)
Individual

cloudworkz

CHARACTERISTICS

- Measure the level of digital knowledge that is required for your employees
- Evaluate the impact of your company's Digital Transformation initiatives
- Simple process
- Optimize your recruitment process
- Promote a digital culture and innovation in your company
- Customisable

cloudworkz

BENEFITS

- Identify potential leaders or participants in Digital Transformation programs.
- Have a general diagnosis of how different areas and profiles are prepared for an evolution towards a digital organization.
- Recruitment process (both for the organization and recruitment to programs or initiatives).
- Pre and post measurement of training programs.
- Know how the mindset and knowledge of our employees / areas evolve over time (and after strategic actions carried out by the organization).

cloudworkz

VALIDATION OF

MEASUREMENT MODEL

VALIDITY

Construct validity with Factor Analysis
Evidence that the test behaves as hypothesized.

Content validity with Inter-judge validation
Evidence between the content of the test and what you are trying to measure.

RELIABILITY

Internal consistency with Cronbach's Alpha
Expresses the extent to which the responses are coherent enough to conclude that all items are measured the same and can be added together in a total score.

cloudworkz

The tool measures **two dimensions:**

SOFT SKILLS

DIGITAL MINDSET

Evaluates the behaviour and trends when taking action in a variety of situations based on characteristics related to digital field.

HARD SKILLS

DIGITAL KNOWLEDGE

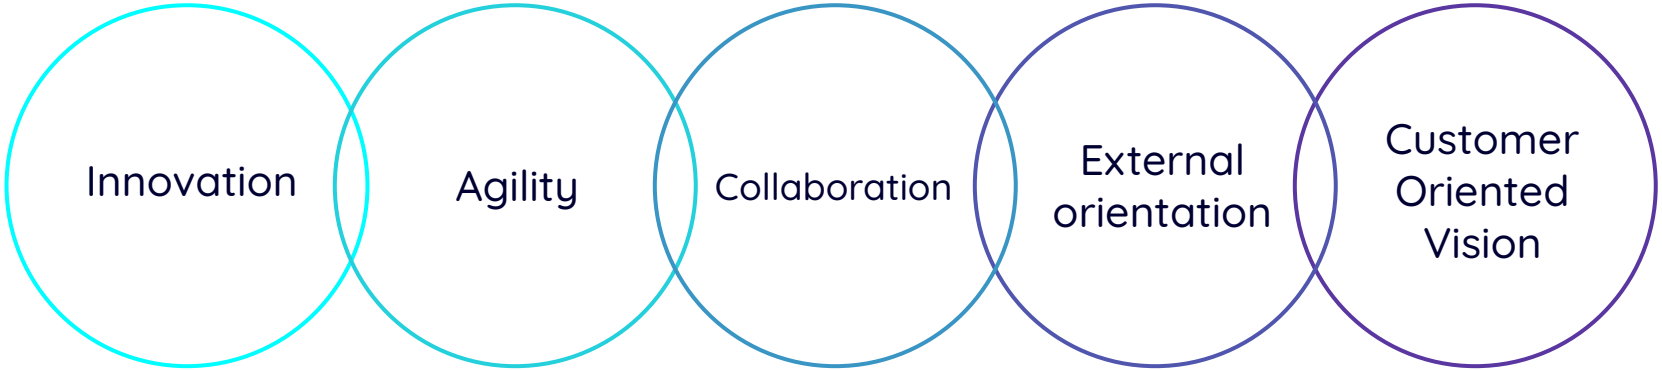
Evaluates the level of comprehension and management of concepts related to digital field.

cloudworkz

SOFT SKILLS

DIGITAL MINDSET

5 Sub-dimensions



cloudworkz

The employee generates or adapts **new ideas**, assumes **calculated risks**, and **makes implementation efforts** to resolve a specific problem or process.

The employee seeks to deliver value in the shortest possible time with an **iterative and incremental approach**, and has a **fast-failure mindset** that allows him to learn from his mistakes and **adapt to change**.

The employee seeks to break the traditional silos through **frequent** and **transparent communication**, as well as **collaborative work**.

The employee is aware and keeps track on **opportunities** based on the **needs** and **trends** that are **outside the organization**.

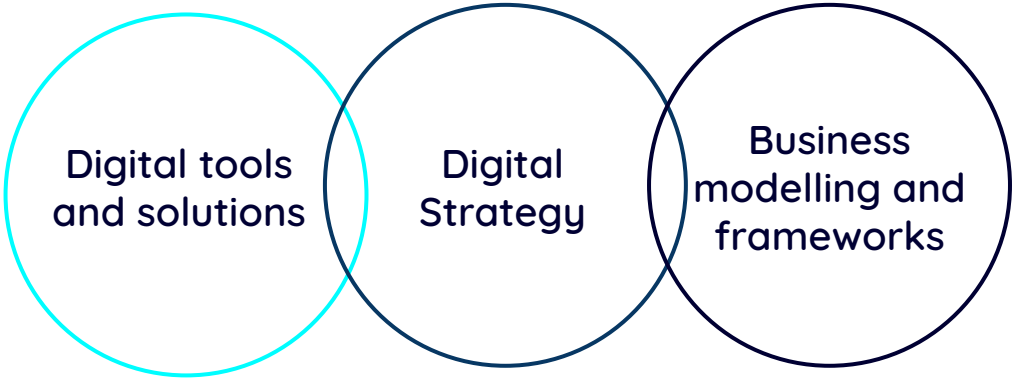
The employee seeks to **identify the customer's needs**, seeking constant **feedback** and **building relationships** with him.

cloudworkz

HARD SKILLS

DIGITAL KNOWLEDGE

3 Criteria



As one advances through the 3 levels of difficulty questions are simplified or made more complex depending on the marked answers.(with at least ⅔ correct questions).

cloudworkz

Digital Tools and solutions

Digital Strategy

Frameworks & Methodologies

Current Tools

Knowledge of current technological tools that allow fulfilling the basic functions within a digital organization (making queries, sharing information), as well as knowledge about types of software and programs.

Emerging Tools

Knowledge of emerging trends in technology such as augmented reality, virtual reality, artificial intelligence, big data, among others.

Machine Learning / GCP

Knowledge about artificial intelligence, specifically Machine Learning, as well as tools like GCP (Google Cloud Platform).

cloudworkz

Digital Analytics

Knowledge and use of tools that allow the performance of digital assets to be measured according to the company's objectives.

Digital Advertising

Knowledge and use of the tools that allow advertising to the brand.

Search Engine Optimization

Knowledge of the concepts and strategies to improve the appearance of the brand in search engines.

Social Media

Knowledge of the concepts and use of social networks to meet the brand's objectives.

Digital Strategy

Knowledge of the concepts and strategies of digital marketing.

cloudworkz

Agile Methods

Knowledge of agile methods and frameworks (Scrum, Kanban) that enable agile project and product management (iteration, prototyping and user-testing to generate value as fast as possible)

Business Models

Knowledge of frameworks such as Lean Startup and Business Model Canvas, measuring the understanding of different elements of business models necessary to achieve proposed objectives.

Frameworks and Customer-centric design

Knowledge of methodologies like Design Thinking, Design Sprint and concepts of UX. These methodologies enable deeper customer needs´ understanding and designing better products/services.

cloudworkz

DIGITAL KNOWLEDGE:

CUSTOMIZABLE SETTINGS

- **Knowledge modules:**

  Recognizing that the expected digital knowledge may vary from sector to sector, in each area and according to the objectives for which the assessment is being used, the client will be able to choose which knowledge modules to activate in the test.

- **Increased difficulty:**

  In some cases, it is sought to have greater control over the response process in the knowledge area, so the client may request a time limit for each level of knowledge (e.g., the user will have 1 minute to answer the questions of level 1 of digital analytics).

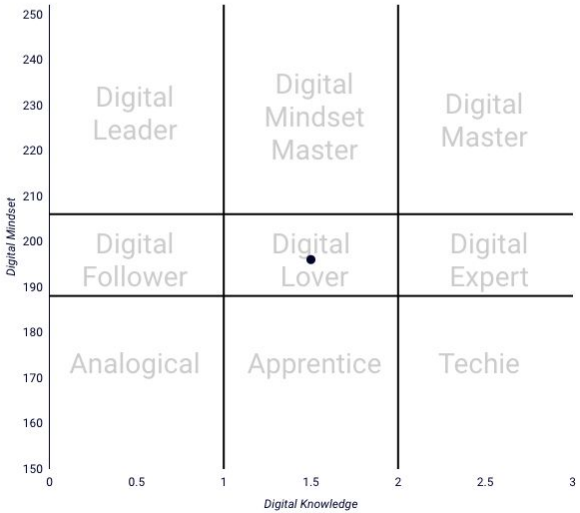
Area Marketing **Position** Director



Profile description

Digital Lovers show the capacity to accept and adapt to the challenges of digital transformation and even be supportive along the process.
They tend to be at a moderate level of digital knowledge while understand it is an important change. Digital Lovers are in the process of improving their digital knowledge on "agile methodologies", business modelling frameworks, user's knowledge, trends on emergent digital tools such as the internet of things and collaborative economy, and artificial intelligence; also digital strategy concepts such as social media.
Digital Lovers are in the process of strengthening their digital mindset, solving complex problems creatively, planning how to implement those solutions, working in an agile manner, performing short experiments, learning from own mistakes, and using client's or user's constant feedback for sustained improvement.
Digital Lovers are also in the process of improving their collaborative work methods, feeling more comfortable with teamwork, listening to others' ideas, building upon them, sharing information and knowledge with others. They are working on maintaining an outside-oriented view, keeping open eyes on changes, innovations, and actions taken by suppliers or partners. Digital Lovers form collaborations with clients and suppliers to react to influences from outside world.
Digital Lovers recognise the importance of knowing the client's/consumer's needs when designing their products/projects. However, they are still developing the competences to identify those needs and line them up with the project's objectives and design.
Lastly, Digital Lovers use digital devices and social networks in a daily basis and use them aiming towards productivity and social positioning. Digital Lovers have been trained and are capable of facing digital transformation.

cloudworkz

Assessment
express

Individuals need to explore different courses of action depending on the type of digital mindset they have

cloudworkz™

University of California Berkeley (2020)

Use case

- 20 people in the company.
- 8 different areas
- *Objective:* figure out current situation in the company (digital mindset and knowledge).

Results:

- Digital leaders were discovered to lead the process of digital transformation in the company.
- Some areas needed improvement.
- Innovation challenges were defined.

cloudworkz

Use case Interbank

- Part of the bank's recruitment process.
- Candidates that are hired must have at least a *moderate digital mindset*. 4 top sections - Digital Lover, Digital Expert, Digital Mindset Master and Digitar Master.
- *Objective:* make sure the job profile is well selected from the beginning regarding the company's objectives (digital transformation).

Results:

- Most effective recruitment process.
- All employees adapt and accept the challenges of digital transformation.

Use case BELCORP

- Trainings (40 people). Topics: digital knowledge and digital mindset.
- Baseline measurement and post-training. Evaluate the impact on skills.
- *Objective:* measure effectiveness of trainings.

Results:

- 76% of the participants were satisfied with the skills program.
- Digital knowledge and mindset improved.
- Results with metrics.
